

WILDLIFE CONSERVATION POLICY

The Wildlife Conservation Policy has been developed to ensure the protection of wildlife and its sustainable use. This policy covers measures aimed at preserving wildlife habitats, ensuring the continuity of wildlife populations, and maintaining ecological balance.

In Türkiye, the Wildlife Conservation Policy is governed by **Law No. 2872 on the Environment, Law No. 4915 on Land Hunting**, and the relevant regulations enacted under these laws. The primary objective of this policy is to ensure the conservation of wildlife and the sustainable management of biodiversity.

This policy aims to protect wildlife habitats, ensure the continuity of wildlife populations, and keep wildlife populations under control through scientific methods.

PRINCIPLES OF THE WILDLIFE CONSERVATION POLICY

- Ensuring the protection of wildlife and its sustainable use
- Conserving wildlife habitats
- Protecting wildlife species
- Maintaining wildlife populations under control

OBJECTIVES OF THE WILDLIFE CONSERVATION POLICY

- Protecting wildlife species
- Conserving wildlife habitats
- Protecting biological diversity
- Ensuring the economic and social benefits of wildlife resources

The Wildlife Conservation Policy is a key instrument for the protection of wildlife in Türkiye. Effective implementation of this policy ensures the protection of wildlife resources for future generations.

KEY CHALLENGES RELATED TO THE IMPLEMENTATION OF THE WILDLIFE CONSERVATION POLICY

- Habitat loss
- Climate change
- Illegal hunting
- Wildlife diseases and pests

Measures are taken to address these challenges in order to enhance the effectiveness of the Wildlife Conservation Policy.

FUNDAMENTAL ELEMENTS OF THE WILDLIFE CONSERVATION POLICY

- **Habitat Conservation:** Protecting the habitats necessary for the survival and reproduction of wildlife species and preventing habitat loss caused by human activities.
- **Species Conservation:** Protecting endangered species and ensuring the continuity of their populations.
- **Population Management:** Regulating wildlife populations through scientific methods to maintain ecological balance.
